

RITEKNIFE™

Innovative Leaders of Safety Knife Technology

AS100

The **Level 3 AS100** features an ergonomic aluminum handle, soft touch accents, fixed blade with easy tool-free blade changing, and a steel locking guard.

Simply unlock the safety mechanism, squeeze the trigger and cut. The guard will automatically return to the 'safe' position as soon as it leaves the material being cut – locking into place and protecting the user against accidental cutting.

Cuts tapes, corrugate, films, and everything else your current utility knife does.

The Mozart® blade made in Solingen, Germany will ensure the best possible cut.
